AssetLife

Technical Steering Committee — Meeting #1

28 October 2026

github.com/assetlife-project/assetlife · docs.assetlife.org

Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

Housekeeping

- Roll call — TSC voting members present
  Quorum check before the votes
- Notes posted publicly on the AssetLife wiki
  https://github.com/assetlife-project/assetlife/wiki
- Presentations materials : should be in the LFX page, or should we open a dropbox account ?

Agenda

1 Main topics

Tour of the new repository · Type checking in CI · DataFrames as datasets

2 Votes

Linting & type checking · DataFrames

3 Marketing

Workshop organization · Other ideas

4 Open questions

Any other business · Next meeting

The new repository at a glance

- **Home:** github.com/assetlife-project/assetlife
- Hosted by **LF Energy**
- **Version:** 0.3.1 — Alpha
- **Python:** ≥ 3.12 (tested on 3.12 – 3.14)
- **License:** Apache-2.0
- **Docs:** docs.assetlife.org

src/assetlife/

lifetime_models — lifetime distributions

stochastic_processes — renewal, NHPP, …

policies — maintenance policies

sampling — simulation of trajectories

datasets — example datasets

Same public structure as ReLife 3.0

What changed from ReLife

	ReLife (rte-france/relife)	AssetLife
Status	Archived on 14 Sep 2026 (v3.0.0)	Active, under LF Energy (v0.3.1)
Python	≥ 3.11	≥ 3.12
CI	Tests only — Linux, Python 3.11	Format + type check + tests — Linux & Windows, 3.12 – 3.14
Configuration	ruff.toml, pyrightconfig.json, pytest.toml	All in pyproject.toml; tox environments
Local hooks	—	lefthook pre-commit (ruff, dprint, uv lock)
Dependencies	Single dev group	Split groups: lint, type, test, docs; Dependabot weekly
Release & docs	Manual release; docs built on push to main	PyPI trusted publishing; versioned docs per release
Community	README only	CODE_OF_CONDUCT.md, CONTRIBUTING.md
Runtime deps	numpy, scipy, matplotlib, optype	+ pandas (NHPP fit accepts DataFrames)

Type checking in CI: should we?

Today: basedpyright (strict, Python 3.12 & 3.14) runs in CI and is type checking is required to merge

For

- Code stays logic, less review noise
- Bugs caught before review
- Typed public API (py.typed) stays reliable

Against

- Higher entry barrier for new contributors
- Strict rule sets can be noisy
- Stub packages (scipy, pandas) may break CI

Question: where type checking must be required in CI ?

Options for the vote:
A. Type checking blocking everywhere (pre-commit and GitHub CI)
B. Type checking advisory locally (IDE only), blocking in GitHub CI
C. Type checking advisory only
D. Type checking blocking only we merge on main. Develop is not affected

Introducing DataFrames as datasets

Today: dataset loaders return NumPy structured arrays; pandas is already a runtime dependency (NHPP fit takes DataFrames).

Proposal: make DataFrames a first-class input for fitting.

For

- Familiar to most users
- Named columns, easier exploration
- Clearer arguments (tabular data is a natural fit)

Against

- API change (acceptable while in 0.x)
- Two data paths to maintain (NumPy / pandas)
- Typing would rely on Pydantic (no rigorous DataFrame typing)

Options for the vote:

A. Open the fit method to DataFrames only
B. Include optional Dataframes in fit method and keep Numpy arguments
C. Stay NumPy-only for fit

Votes

Motion	Decision
Type checking in CI	Option: D
DataFrames as datasets	Option: A

Marketing

Workshop organization ?

- Audience: utilities, asset managers, academia ?
- Format: online or on site, length ?
- Content: introduction + hands-on notebooks ?
- Date ?

Other ideas?

- Announcement on LF Energy channels ?
- Blog post / case study ?
- Talks at community events ?
